Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. In response to the amendment filed on 05/06/2003, claims 1- 9 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 2828

Claims 1-9 are rejected under 35 U. S. C. § 102 (e) as being anticipated by Horie et al., U.S. patent No. 6,323,052.

Regarding claims 1-5 and 8-9, Horie et al. disclose the a semiconductor laser device, comprising: an oxide formed as a protective coating on at least one light emitting end surface of a semiconductor laser chip; and an Si film (14) having a film (See column 15, line 53-54) thickness of 40 \AA or less (See column 15, line 67-68) formed between the at lest one light emitting end surface and the oxide protective coating (See Fig 1). The oxide protective coating comprises AlO_x (See column 16, line 19-37). The semiconductor laser chip has an active layer containing GaAlAs (See column 12, line 9-11), wherein the semiconductor laser is uniform (see fig 24-25).

With respect to claims 6-7, the methods for manufacturing the semiconductor laser device are considered as product by process steps.

Response to Arguments

3. Applicant's arguments filed on 05/06/2003 have been fully considered but they are not persuasive. Applicant amends the claim in order to over come the prior art and applicant argues that the new claims are over come the prior but applicant's argument is not persuasive. Applicant argues that active layer is uniform with respect to absorption an emission wavelength through its length including at respective end portions thereof. However, the active layer is almost uniform (See fig 24 and 25) except to the vicinity of

Art Unit: 2828

the facet (See abstract) but the meaning of vicinity is close to facet so the active layer is uniform. *Horie shows the active layer ^{the same} as the invention.*

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Vy whose telephone number is (703) 605-0759. The examiner can normally be reached on Monday-Friday 8:30 am - 5:30pm.
